Subject: Re: Revised statement

Does this mean the 8/9 data actually is validated?

Subject: Re: Revised statement

Please tell me this is not happening! After an entire day of work we are now saying that the 8/9 data is not validated. This is not acceptable. We need to get this out tonight. That was our commitment to the Navajo President. Please bring in Area Commander David Ostrander.

Christine Wagner here just informed us she does not have approval for the data from the 9th. She got the Region 6 approval for 9/10 mixed up with ours. Dana Tulis just told us they do not have anyone available for approval tonight. Dana says it has to be tomorrow.

We need to send the data for the 9th to Christine Wagner.

Thanks, I'll send now. But, previously we have not included EPA before risk-screening levels. I recommend remaining consistent.

Ok. That change made below. Ready to submit to HQs? Are we ok with

release at 7:00 a.m. tomorrow rather than tonight, since it is 10:30 in DC?

Yes only 7,8 and 9 only. According to team this is the only "validated" data. Language looks. Would use "segment" rather than "leg". Also I would say that "additional testing" instead of "additional review".

Melissa put the information you provided in the required format. Take a look. To confirm, we are only releasing four stations over three days? We will need to change the tables.

Subject: Revised statement

Team: for purposes of this interpretative statement to go out today, we have narrowed our focus to just the four stations, and solely the fully validated data of Aug 7 to 9. Gerry, please confirm the accuracy of what we have drafted – please reply asap...in particular, please confirm that for Aug 7, 8 and 9 at the four stations (SJLP, SJFP, SJHP and SJSR) we have no metals exceedances...or correct this.

Next steps: Tuesday we can have validated data from the Aug 10, 11 and 12 analyses and draw conclusions.

Deliberative Process/Ex. 5

Jared: next steps – Gerry Hiatt will continue to refine the data analysis this weekend with input from Water Division's Janet Hashimoto, feeding this to Harry Allen and Enrique. Enrique will task Ned Black with doing same for the agricultural risk-screening level data. Gerry will send tabular data he has to the team. Enrique notes via Clancy the validated data will be uploaded by the JIC in due course, so this (above) is the sole interpretive statement thus far, and begs the NN interest in agricultural uses of the water. **Please ensure on the Aug 7,8 and 9 fully validated data is the only data uploaded to the JIC today. Thanks all.**
